

MEXT MINISTRACIONAL CONTROLLEDスーパーグローバル大学創成支援事業

The Top Global University Project

豊橋技術科学大学

Toyohashi Tech was selected as one of 37 Japanese universities to participate in MEXT's "Top Global University Project"

http://www.tut.ac.jp/english/news/201410/4230.html

In 2012 it was selected for the National University Reform Enhancement Project, and in 2013 for the Leading Graduate School Program as well as the Program for Promoting the Enhancement of Research Universities.

By putting these programs into practice, Toyohashi Tech aims to raise its global profile to the point that it becomes recognized worldwide as a leading international university.

Thanks in part to its efforts in this regard, Toyohashi Tech applied for, and was selected to take part in, the Top Global University Project under the category of Global-Leading Type (type B).

In order to achieve the goals of this project, Toyohashi Tech will create a truly multicultural campus which will help foster high quality engineers with thoroughly international sensibilities.

These 'Global Technology Architects' will be able to apply their advanced technological skills and scientific training to global issues, and their leadership skills and vision to getting the job done in the real world of industry.

The following initiatives will be taken to realize this;

"Creative Campus for Nurturing Global Technology Architects"

- Global Technology Architects course
- Multicultural Boarding House
- Global capability upgrade of all students, faculty members and university staff

Comments by President Takashi Onishi on being selected for this Project I am overjoyed to see that Toyohashi Tech has been selected for the Top Global University Project.

At Toyohashi Tech we have a long history of collaborative international research and actively accepting students from overseas, but with this opportunity I hope we can take another step towards becoming a university worthy of the name of a Multicultural

Toyohashi Tech specializes in providing higher education to graduates of Japan's

We also enthusiastically accept students from regular and technical high schools to join our mission to provide the core human resources to support Japan's industry.

Providing all of our students with the opportunities to become leading engineers and researchers on the wider global stage will enable them to further assist in the development of Japan's primary sectors.

Toyohashi Tech's Top Global University concept aims to create an environment where undergraduate and graduate students from inside and outside the university can further themselves through friendly rivalry, beyond the barriers of language and

Through this, we aim to foster global technology architects: creative leaders in science and technology with a solid international grounding.

Toyohashi Tech is fortunate to be a facility with nearly 30% of its students living on campus.

We intend to augment this with shared-house style dormitories in our new Multicultural Boarding House.

Overall, through this new project, we aspire to truly become a campus both in name

We look forward to receiving your advice and support.

Takashi Onishi

President, Toyohashi University of Technology

Selection for the FY 2014 **Top Global University Project**

We hereby announce the selection of universities for the Top Global University Project.

1. Summary of the Project

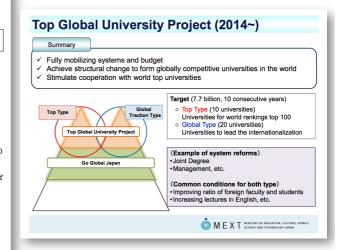

The Top Global University Project is a funding project that aims to enhance the international compatibility and competitiveness of higher education in Japan. It provides prioritized support for the world-class and innovative universities that lead the internationalization of Japanese universities. Selected universities are expected to press forward with comprehensive internationalization and university reform.

 \circ Type A (Top Type)
The Top Type is for world-class universities that have the potential to be ranked in the top 100 in world university rankings.

oType B (Global Traction Type)
The Global Traction Type is for innovative universities that lead the internationalization of Japanese society, based on continuous improvement of their current efforts.

2. Summary of the Selection

A notification of an open call was sent to the presidents of all national, public and private universities on April 15, 2014, with the deadline of the call on May 30. After receiving 109 applications from 104 universities, the Selection Committee for Top Global University Project (Chair: Tsutomu Kimura, chairman of the Tokyo Metropolitan Government's Board of Education) conducted screenings of the applications, and 37 projects (37 universities) were selected as attached.

Onishi's Vision: The Five Challenges of Toyohashi Tech

Realizing a Multicultural Global Campus

- Fostering Engineers and Researchers innovating in Technological Science 2.
- Enhancing Research Capabilities centered on Interdisciplinary Research 3.
- Creating Knowledge and Technology to enhance the Safety and Security of Society
- Fostering Researchers who can thrive in a Borderless World

Creative Campus for Nurturing Global Technology Architects

■ Toyohashi Tech's 10 year Vision ■

A glimpse at how TUT will look on completion of the program in 2023:

A university of technology with a focus on graduate studies which recruits technical college students and outstanding talent from around the world, which is forging a new era in science and technology, and fostering high-level engineers active on the global stage.

A campus where a global perspective shared across the university creates a welcoming environment for international students, teachers and staff. A barrier free environment in terms of language and culture permeates the entire university.

Global Technology Architects Course

Multicultural Boarding House for students from across the globe

Global Capability Upgrade of all students, faculties members and university staff

Pioneering science and technology worldwide Course for Global Technology Architects

Global communication capability

Problem solving skills under diverse value sets

Interpersonal skills applicable globally

Multicultural Global Campus

Engineers and Researchers with the capability of applying advanced technological skills and scientific training to tackle global issues, and the leadership skills and vision to getting the job done in the real world of industry **Global Technology Architects:**

Implementation (1)

1. Global Technology Architects Course

Architecture and Civil Engineering **Environmental and Life Sciences** Computer Science and Engineering Electrical and Electronic Information Engineering Department of Mechanical Engineering Set courses in all Standard course Departments Comprehensive undergraduate-graduate school program **Global Technology Architects Course** Residential boarding house

- Bilingual (English and Japanese) lectures

 - Teaching materials / blackboard notes = English Leaching materials / Broglish and Japanese Expanding to standard courses, goal to make all courses bilingual in ten years' time - English syllabus, numbering, GPA Internationalization of the educational system
- Strengthening language skills in both English and Japanese
 - Tutoring under mentors, use of TA, putting into practice inc Ensuring minimum 250 hours of learning time per year
 - TOEIC 730+, Japanese Language Proficiency Test N1
- Diversification of the student body

 - Total number of places = 290 (Japanese: 140 / International students: 150), 15% of the total student body
 - Increasing the total percentage of international students to 23% or more Residential program in on-campus boarding houses

Establishing the new global-barrier free course as a model for comprehensive university reform.

Course design

1st year matriculation total 15 international students primarily from ASEAN

Late specialization from 3rd year 1-2 year joint course

Admission Office entrance test test prior to coming to Japan

International students primarily from ASEAN → Gradually expanding to Europe / USA

Undergraduate 1-2 years

Undergraduate 3-4 years

Master's Program

3rd year transfers total Technical college graduates

Technical college graduates international: 15

roblem solving Global Internship Program

Learning skills for identifying/ solving problems in a global context

Global Technology Architects Course

Courses by programs

Strategic utilization of the Penang Campus
Promoting credit transfer, Joint degree / double degrees with partner schools worldwide

Taking specialized courses in English

Reinforcement of Japanese language

Taking specialized courses from the regular departments with bilingual lectures

Reinforcing language skills in Japanese and English

Connection to related programs, such as the Leading Graduate School Program, the Program for Promoting the Enhancement of Research Universities, and others.

Linguistic requirements for Graduation TOEIC 730+ nese Language Proficiency Test N1

2. Multicultural Boarding House for students from across the globe

36%* of all students living, eating and studying in an international environment on campus.

(One guarter are international students)

*inclusive of existing student apartments

- Fully residential boarding house where the course's students will live
- English as the standard language
- Shared-house style with five students to a room (newly built with outside capital, having 180 rooms in six buildings)
- Permanently stationed house masters / residents' assistants
- The student-run Boarding House Association plans learning support programs and various events
- Also used for residence by an international mix of short / medium-term internship students from partner universities worldwide and up to 200 students from Japanese technical colleges.
- Creating a multicultural environment on campus to spur university-wide globalization

the City University of New York)

Developing interpersonal skills applicable globally through Japanese and international students living together
